

How to Create a Puppet Pals Project

You are limited to five photos for your backdrop

This is the "stage." Keep the actors off stage...

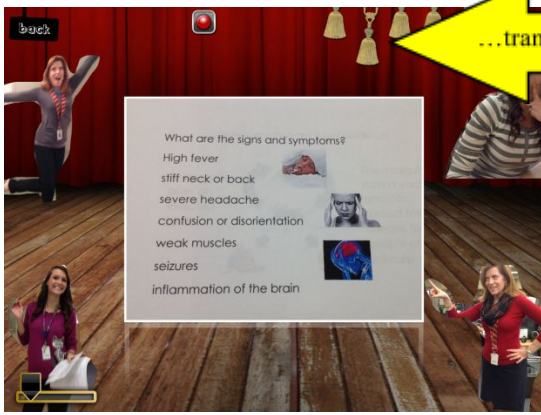

...until you are ready for them to appear on the screen

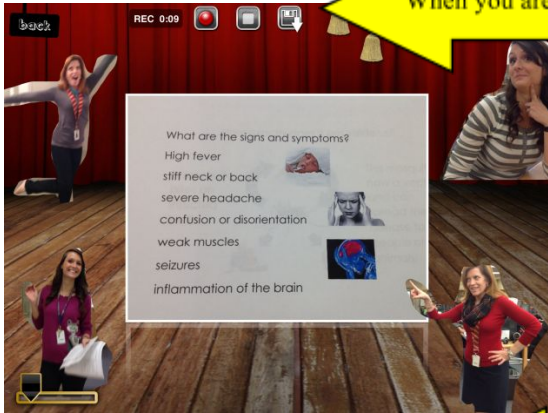

Be careful of accidentally hitting this bar when moving your actors – only touch it if you want to enlarge the stage

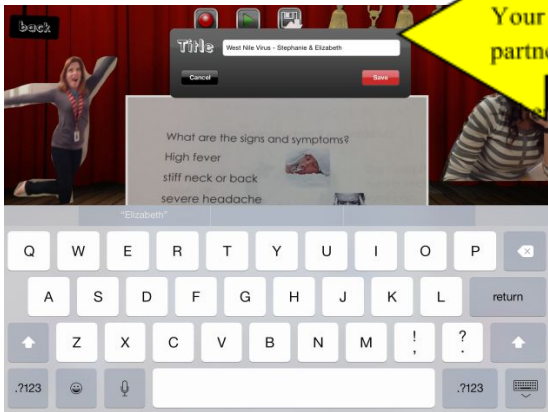

Tap when you are ready to record. Practice beforehand – you only get one shot or you have to start over. Move your actors back offstage before...

...transitioning to a new background

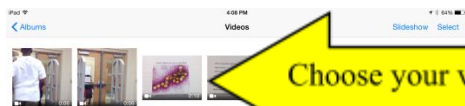

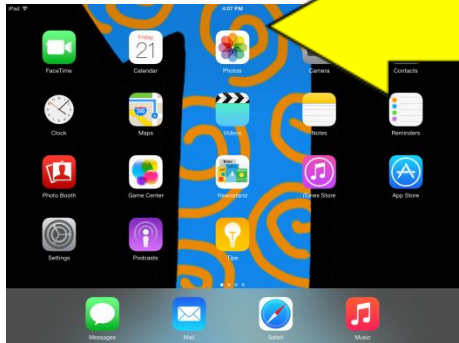

When you are done, save your project

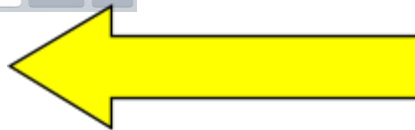

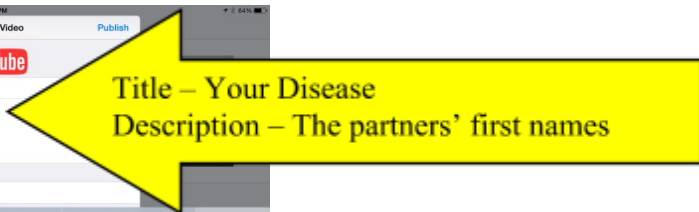

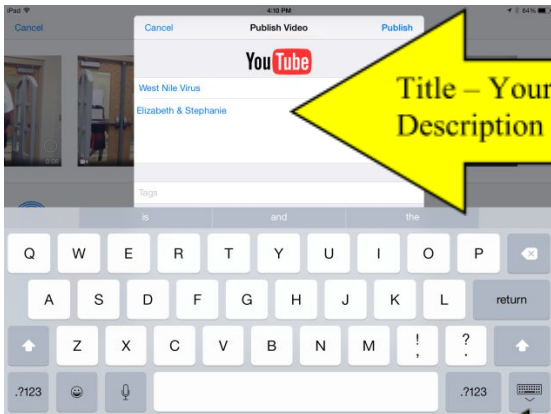

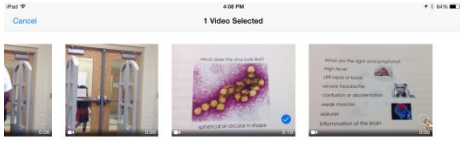

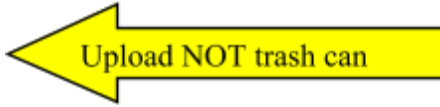

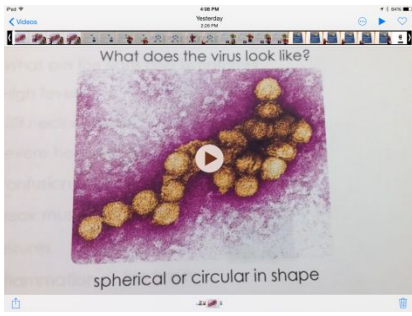

Your title should be your disease name + partners' first names. Don't forget to save!

tap save
